T-Comm™ Accessory
for the Neptune™ Sound Processor

Hear Your World More Clearly and Easily
by Advanced Bionics
T-Comm™, Your New Everyday Accessory

Advanced Bionics introduces the T-Comm™—a lightweight accessory for the Neptune™ sound processor. The T-Comm delivers the natural microphone placement of the T-Mic™, easy connectivity, and a built-in T-coil. This new accessory is designed to provide recipients with greater clarity, comfort and convenience for hearing your world.
Natural Microphone Placement
The T-Comm features AB’s patented T-Mic™ Microphone, which takes advantage of the outer ear’s natural sound-collecting abilities. The result: a focused, effortless listening experience. The microphone’s optimal placement at the opening of the ear lets you talk on your cellphone and enjoy popular hands-free headsets just like your normal-hearing peers.

Easy Wireless Connectivity
Ideal for effortless listening, the T-Comm provides simple wireless connectivity to MP3 players, mobile phones and other audio devices without the need for any wires, cables, special adapters, or connectors.

Added Convenience
The T-Comm also features a built-in T-coil, which picks up sound if you have a compatible telephone, neckloop, or other accessory.

Customized Sound
When connected to the Neptune processor, the T-Comm allows for ear-level sound input from the T-Mic microphone, T-coil, or a mix of both to suit your individual hearing needs.

*Detach the T-Comm from the Neptune processor prior to use in water.
For Insurance Reimbursement Assistance:
AB Insurance Reimbursement Specialists are available to assist you in determining your health plan’s coverage. If your plan requires pre-authorization, AB Insurance Reimbursement Specialists will coordinate with your provider to obtain the information required for approval. AB cannot guarantee coverage or payment by your health plan.
