

Helping Kids Hear Their Best

NEW REHAB APPS FOR CHILDREN

from Advanced Bionics

From the industry leader in rehabilitative and educational tools for cochlear implant recipients come two exciting new rehAB iPad® apps designed to help children hear their best.

The AB **Listening Adventures** and **VocAB Scenes** apps have been specially designed for caregivers or therapists to guide the development of listening and language skills in children with hearing loss ages 4 to 10.

AB Listening Adventures is an engaging app providing children with a fun way to practice listening for words in sentences.

Features of this app include:

- Six different story-based games
- Focus on listening for multiple elements, plurals, pronouns, or minimal pairs
- More than 100 sets of words
- Fun sound effects and character voices
- Many opportunities for teaching vocabulary and sentence structure
- Apple iPad® device compatible

The colorful, entertaining VocAB Scenes app is designed to help children learn common vocabulary and question forms through listening.

This app features:

- Six different scenes (outside water fun, beach, pet store, swimming pool, camping, and winter fun)
- 12 different drag and drop items for each scene
- Three different games for each scene to promote listening and language development
- Apple iPad® device compatible

Kid-safe—both apps are safe for children, with no links to sites that take them out of the app and no offers for sale of any other products or services.

Each app is available to download for \$1.99 from the iTunes® app store.
