playing sports

excelling in the classroom

TOOLS for TODDLERS

Technology that Helps Little Ears Grow BIG

as an ADULT...

DuoPhone feature†

Automatically stream phone calls to both ears simultaneously so you can hear in stereo

ZoomControl feature†

Focus listening to a speaker to the front-back or right-left of you for improved communication

Naida CI sound processor

Flexible technology inside that is ready to advance as soon as you can graduate to more advanced sound processing features

Bilateral/Bimodal

Hearing with two ears means you can understand your parents, teachers and friends even better

as a TEENAGER...

StereoZoom† feature

Focus on a single voice at a noisy restaurant so you can easily hear one-on-one conversation in noise

AutoSound technology

Comfortably hear soft whispers in the library and friends shouting on the playground without having to make any program or setting changes

as a TODDLER...

HiResolution™ sound

Superior technology that allows you to hear the rich variations in music and voices as your parents sing you nursery rhymes

Neptune™ sound processor

Built Kid Tough™ this waterproof processor allows you to continue chatting with your parents even as you take a bath or play at the beach

QuickSync feature†

Easy, one-touch control, so any volume or program adjustment you make on one processor is automatically applied to the other

as a SCHOOL CHILD...

Wireless connectivity

Allows you to connect to Phonak's Roger system so hearing teachers and classmates is easy

T-Mic™ 2 microphone

Unique in the ear microphone so you can listen to the latest hit songs using headphones

UltraZoom feature

Focused listening for a small group assignment while chatter from other small groups around you is reduced

AquaCase™ enclosure

Protects the Naida CI so you can do anything and everything without having to sacrifice hearing

HiRes Fidelity 120™ sound processing

Listen to music in high fidelity with AB's sophisticated current steering sound processing strategy

ClearVoice™ technology

Technology that automatically analyzes and adapts to each listening situation that you encounter, separating the distracting noise from what you want to hear most
